NATIONAL INSTITUTE OF MENTAL HEALTH

CUMULATIVE BIBLIOGRAPHY FOR F. Y. 1961 - 1966, INCL.

Research Documentation Section
Statistics and Analysis Branch
Division of Research Grants
National Institutes of Health
Bethesda, Md.

INTRODUCTION

This bibliography, listed numerically by grant number, is the NIMH portion of a six-year cumulative bibliography of PHS grantee publications. It was compiled from data cards which were used to prepare the bibliographic lists contained in the six annual issues of the Research Grants Index (1961-1966). Two changes in the format of the RGI during 1961-1966 account for the margin variations in this publication.

The bibliographic list includes names of principal investigators of all NIMH research grants which appeared in the f.y. 1961-1965 RGI editions, even though some of the grants had no publications; but the names of investigators who were awarded new grants in f.y. 1966 but had no publications are not included. In instances where the principal investigator changed during the project period, only the name of the most recent investigator is shown.

An alphabetical listing of the NIMH grantees is appended to the bibliography, and a list of grantees for all Institutes/Divisions for the same period is attached.

Extra copies of this bibliography, as well as the separate listings for other PHS Institutes/Divisions, are available in limited number from the Research Documentation Section, SAB/DRG.
